Abstract (en)
[origin: US5794895A] PCT No. PCT/EP96/00871 Sec. 371 Date Mar. 20, 1997 Sec. 102(e) Date Mar. 20, 1997 PCT Filed Mar. 1, 1996 PCT Pub. No. WO96/30979 PCT Pub. Date Oct. 3, 1996A device for securing cables and conduits in switchgear cubicles with a securing bracket which is releasably secured to a support, a plate or a rail in the cubicle, and, to receive the cables and conduits has a bracket section projecting from a securing plate which has an inwardly angled end section which is engaged by a cover section that also projects from the securing plate, leaving an insertion aperture. The device can easily be built into switchgear cubicles using simple parts because a catch bracket is used to engage with the securing plate of the securing bracket and because securing side arms of the catch bracket can engage in suitably spaced and sized engagement slots in the support, the plate or the rail.
