Abstract (en)  
[origin: EP0818163A2] The drawer guide has a fixed guide (1) attached to the sides of the drawer recess by spaced out support yokes (2). Hanging or push-fit connections (6,13) are provided for the guide rail and support yokes so that the guide rail can be hung in or pushed in sockets (6,9) formed out of the support yokes by tabs (13) provided on the outside of the guide rail and formed out of the material of same. At least one connection has a self-locking fall-out safeguard (7). This safeguard can be a protruding knob or similar which when the plate or tab (13) is pushed in engages in an opening (15) on the rail. The connection can be a hanging connection where the tab on the rail points down with its insert end across the rail and hangs from above over the web (6) of the support yoke mounted in the longitudinal direction of the rail,.
