Abstract (en)
The invention relates to a collapsible chair (1) comprising: a seat part (2), a back support (3) connected pivotally to the seat part (2), a leg support (4) connected pivotally to the seat part (2) at a distance from the back support (3), and a frame with front (5) and rear (6) legs connected to the seat part (2), wherein the chair is adjustable between a collapsed position, in which the back support (3) and the leg support (4) are pivoted substantially against the seat part (2), and a lying position in which the leg support (4), the seat part (2) and the back support (3) are located substantially in the same plane. <IMAGE>
