Abstract (en)

[origin: WO9631921A1] An electrical connector assembly according to the present invention is shown generally at (2). The assembly (2) includes an electrical connector (4) having a housing (6) wherein multiple electrical contacts (8) are disposed and an actuator (10). A flexible printed circuit (12) is shown having a plurality of circuit traces (14) thereupon for interconnection with the contacts (8) of the connector and an electronic component (16) upon the flexible printed circuit (12). Additional circuit traces (18) exit the electronic component (16) and are interconnected with a device (20). The electrical connector (4) enables the disconnection and replacement of the electronic component (16) and the device (20).
