Abstract (en)

[origin: EP0819619A1] An apparatus (10) for discharging the contents of an aerosol container (12) and for creating an opening in a substrate. The apparatus includes a rod member (14) having a front (18) and a rear end; a holder (20) for the aerosol container (12) disposed adjacent the front end of the rod member (14); an arm (23) which effects movement of the aerosol container actuator between discharging and non-discharging positions; a trigger (24) and linkage (27) system which controls the movement of the actuating arm (23); and a stake member (30) for creating an opening in a substrate, such as the ground. <IMAGE>
