Abstract (en)

[origin: EP0819817A2] Sealed insulating glass units, with multiple-pane construction contain an intermediate, flexible heat-shrunk and taut plastic sheet (16), are made using a silicone edge sealant (13) that exhibits a sheet creep of less than 0.018 cm after 500 hours at 71 DEG C. Said plastic sheet (16) remains substantially wrinkle free in this construction by use of silicone edge sealants (13). <IMAGE>
