Abstract (en)

[origin: EP0819890A1] The device described for controlling a gas burner (2) comprises an electronic circuit unit (7) for controlling the burner (2) and functions associated therewith, an igniter unit (5) which is intended to generate a high-tension electrical discharge between electrodes associated with the burner and which includes at least one high-tension circuit portion (15), and at least one solenoid valve (4a, 4b) which is intended to control the supply of gas to the burner (2) and is electrically connected to the control circuit unit (7) remotely by means of a connector (8) in which at least the high-tension circuit portion (15) of the igniter unit (5) is housed. <IMAGE>
