Abstract (en)
[origin: EP0820712A2] The drawer rail (3) is fixed on both sides to the drawer (22) and the body rail (1) is fitted on two opposite inner walls (11) of a furniture body accommodating the drawer. A middle rail (2) is fitted between the drawer and body rails. The body rail is U-shaped, whereby one arm is formed as installation edge for fixture to the body inner surface and is connected with the second rail of the U-shape, which is formed as a vertical bearing wall, by a horizontal running surface (14). The bearing wall on its outside turned away from the body inner wall has two rollers (8) and on its upper end has a further horizontal running surface (15), which has a vertically downwardly facing edge.
