Abstract (en)
[origin: EP0821218A2] A rotary laser irradiating system (35) comprising a laser projector for performing rotary irradiation of a laser beam, a collimating telescope (41) having a collimation axis in a projecting direction of the laser beam, and a rotation base (40) where the collimating telescope (41) can be rotated around an axial line running perpendicularly to the collimation axis and can be fixed at a predetermined position, whereby the collimating telescope (41) is used for the setting of a tilting direction, and the collimating telescope (41) is rotated when necessary, and collimation can be performed at least in two directions. <IMAGE>
