Abstract (en)

[origin: EP0821388A1] The mechanism has mounted upper saddle shaped vertical deflector coils (4) on top of a partition section (2) with a lower horizontal deflection section (3). There is a forward space (12) around the horizontal deflector coil. A fixed attachment (23) on the tube has a section (22) which inserts into this area and an upper plug (29) which fits by friction into a fixing hole mount support.
