Abstract (en)

[origin: GB2299978A] A milk containing beverage containing a dissolved gas is arranged in a pressurised beverage container. When the container is broached and the beverage poured out dissolved gas comes out of solution to form a dispersion of bubbles in the beverage. This may produce a milk-shake like effect. The gas may be nitrous oxide; the beverage may be flavoured and/or contain alcohol and may have a fat content of 7%-12%.
