Abstract (en)  
[origin: WO9633774A1] A portable fire extinguishing nozzle arrangement (L) has a nozzle head (1) provided with fire extinguishing nozzles that may be connected to a supply pipe. A plurality of fire extinguishing nozzles (9) are mutually spaced apart at the free, front side (S) of the nozzle head. When supplied with fire extinguishing fluid, each fire extinguishing nozzle generates a mist of fire extinguishing fluid. The fire extinguishing nozzles (4, 9, 13) may be selectively supplied with fire extinguishing fluid individually and/or in groups through a valve combination (V).
