Abstract (en)  
[origin: WO9633073A1] A dispenser package including a stack of flexible sheets adhered together by layers of pressure sensitive adhesive with first and second ends of successive sheets in the stack adjacent; and an enclosure in which the stack of sheets is arched having top wall portions defining a slot transverse of the top of the arched stack of sheets. The first end portion of the uppermost sheet on the stack projects through the slot and when it is pulled through the slot, it will carry with it the first end portion of the next underlying sheet and leave it projecting through the slot. The enclosure is separable to afford inserting a new stack of sheets into the chamber.
