Abstract (en)

[origin: WO9633960A1] The invention relates to a method of improving the chemical, physical and biological processes in agriculture, horticulture and animal husbandry and in humans. To this end processed carbonaceous mine-stone is used which may or may not be inoculated with microorganisms. The processed carbonaceous mine-stone is used in an amount of 2-30,000 kg/ha and preferably in an amount of 2,000-20,000 kg/ha. In animal feed or when applied for humans the processed carbonaceous mine-stone is used in an amount of 0.1-4% by weight.
