Abstract (en)  
[origin: EP0823226A2] The housing (10) has a number of slits for insertion of the credit cards, which are extracted individually via wipers (22). The wipers are located at the rear of the housing. Each wiper is pivoted to push the respective card out of the housing upon operation of a corresponding displacement rod (38). The wipers and the push-rods are formed integral with one another via an injection moulded component.
