Abstract (en)
[origin: EP0823397A1] A water dispenser for use with a water container or water bottle (8) comprising a cabinet of sufficient size to contain the water bottle with the bottle's open end up, a pumping device (13), a pulley (18), a flexible tube (17) partially wound around the pulley with a first end and a second end and a water tank. The tube's first end has sealing means (26) for sealing the water bottle's open end when the tube is fully inserted into the bottle, the tube's second end is attached to the pumping device. The pulley provides means for inserting the first end of the tube into the open end of the bottle and a means for retracting the tube from the bottle. The pumping device pumps water out of the bottle and into a water tank (16,28). The water tank is connected to a dispensing means (2,3) for dispensing water to a user. <IMAGE>
