Abstract (en)

[origin: EP0823524A2] A window shutter stop consisting of a box-shaped structure (1) pivoted to a support square (3) and fitted with two curved elements designed to automatically hook the edge of the window shutter as it is opened; the stable and reciprocal hooking between said oscillating bracket (1) and the relevant support square (3) being assisted by a special slider (11) shaped like a parallelepiped block fitted between the same.
