Abstract (en)

[origin: EP0823588A2] The electrical unit (5) is positioned on a support (6) which when the roof (3) of the light-permeable lighting body (4) has been removed, can be lifted out of the lighting body together with all the electrical components, sockets and lamps. The electrical appliance support is disconnected from the power circuit by a disconnecter socket (7,8). The electrical appliance holder cooperates with a guide tube (10) extending axially inside the lighting body. The guide tube and the lighting body are the same length. The disconnecter socket consists of a socket part (7) and a bearing (8).
