Abstract (en)
[origin: EP0823715A2] The transformer has respective primary and secondary windings (U_{pw}, V_{pw}, W_{pw}), (U_{sw}, V_{sw}, W_{sw}) for each phase, and a longitudinal regulating winding (U_l, V_l, W_l). There are two transverse regulating windings (U_{q1}, V_{q1}, W_{q1}), (U_{q2}, V_{q2}, W_{q2}) for each phase, cooperating with the primary and/or secondary windings. The longitudinal and transverse regulating windings are each provided by partial windings, in which each longitudinal regulating winding cooperates with the primary and/or secondary windings for the same phase. Each transverse regulating winding cooperates with the primary and/or secondary winding for a different phase.
