Abstract (en)

[origin: EP0825291A1] The washing machine with a horizontal drum, and a plastics washing fluid tub, has a circle of straps (13) at intervals round the base (11), at right angles to the main axis of the base (11). At least three laying surfaces (19) are shaped at the base (11) within the circle, on a plane parallel to the main plane, to take the loading weight (12) with a density of $\geq 2 \text{ g/cm}^3$, to be secured by the straps (13). They are clamped externally by a clamping strip (16) against the narrow mantle surface of the weight (12).
