Abstract (en)

[origin: WO9635367A1] The invention concerns a mounting for or with a brush for a floor-cleaner such as a motor-powered carpet-cleaner, the essentially cylindrical brush being fitted in a cylindrical chamber with a slot-shaped aperture and rotated by side-mounted drive units. In order to make the mounting easier to handle, the invention calls for the chamber (5) to be designed as a cassette (2) which can be inserted in or removed from the cleaner, the slot-shaped aperture being closable by a sliding cover (7).
