Abstract (en)  
[origin: EP0935980A1] The device has a low level laser radiation source providing a laser light beam, which is fed to a mouthpiece (2) inserted in the patient's mouth via an associated handgrip (1), housing the laser radiation source. Pref. the laser light is fed to a light conductor (11), extending along the length of the mouthpiece, with a lens provided at its light output end for focussing the laser light onto the required treatment point.
