Abstract (en)
[origin: EP0826429A2] The adhesive applicator comprises rollers (6,7) which are mounted on a support plate (3) in a suspended and free-floating fashion. The rollers, together with a housing (26), form an adhesive chamber. The support plate is mounted laterally to the rollers, and swivelable about a vertical shaft in the machine frame (1). The support plate has support pins (24,25) on which the housing is removably attached. The housing is provided with a laterally over-hanging bracket which is lockable to the support pins.
