Abstract (en)  
[origin: EP0826497A2] The printer has a colour pick-up (3) incorporating a block (14) and a colour applicator (15) which applies ink to the block. A spring (22) exerts pressure on the applicator, bringing it into contact with the block (14). A pressure adjusting cam (24) regulates the pressure delivered by the spring. It is controlled by a lever arm (23) acting at a distance from the axle (26).
