Abstract (en)

A diver's door which provides easy access to and from an inflatable boat (10) for a diver and which can be replaced to minimize water leakage into the deck of the boat, is described. The diver's door includes a removable support section including a means (36) for releasably attaching the support section to the deck of a boat and a corresponding removable tube element (20) attached to the removable support section to form a single unit removable from the deck of a boat. Also disclosed are an inflatable boat including the diver's door of the present invention and a method for providing access to an inflatable boat using the diver's door of the present invention. <IMAGE>
