Abstract (en)
[origin: EP0826593A2] A clip and panel assembly for carrying various accessories or tools is described herein. The clip panel system can be attached to a buoyancy compensation device (2) used in SCUBA diving or to other sports or utility garments. Semi-rigid plastic clips (8) are engaged with a semi-rigid plastic support panel (6) to hold a variety of tools or accessories. The support panel (6) is affixed to the garment. The clips (8) have clip hooks which fit through slots on the support panel (6) and engage an abutment surface on the underside of the support panel. The clips are engaged and disengaged from the panel by applying simple hand pressure to slightly deform the clips. <IMAGE>
