Abstract (en)
The method involves conveying a web (4) over a smaller diameter roller (11). A plunger (12) picks up and inserts the sealing washers (1) raised from one side of the support strip (6) into the container (3) closure pieces (14). The sealing washers are made of foam plastics coated, on the side facing the container, with a pressure-activated adhesive (5). The sealing washers have lugs (15) clamping them tightly into the closure piece (14).

Abstract (de)
Eine Ablösevorrichtung zum Ablösen von vorgestanzten Dichtscheiben aus einer Bahn weist Mittel zum Umlenken der Bahn auf.
