Abstract (en)

[origin: WO9637653A1] The invention concerns shaped bodies, such as fibres, threads, yarns, woven fabrics, non-woven fabrics, knitted fabrics, mats, films, foils, membranes, paper and the like, which are coated, impregnated or covered with a cellulosic composition. Shaped bodies of this type are produced by a process in which they are coated, impregnated or covered with a solution of cellulose in a tertiary amine oxide, in particular N-methylmorpholine-N-oxide which optionally also contains water.
