Abstract (en)

[origin: EP0828037A2] The end profile and support assembly (10) is for a balcony on a building. It has an inward-extending anchoring flange (14) at the top which engages on the underside of the balcony (2). It includes a vertical facing flange (18) which covers the outer edge of the balcony slab. There are drain holes or slits (26) in the horizontal flange (20) near the sharp corner (34) between the horizontal and vertical flanges. There are large cutouts (22) in the inward extending horizontal flange. There is a covering section (12) extending down from the horizontal flange portion, with a vertically downward-extending portion running into a portion which slopes gently outward followed by a portion (40) with a vertical front face and an acute angled bottom edge.
