Abstract (en)

Module attachable to facades of buildings for evacuating people, comprised of an internal part (1) provided with primary hinged linking means (6) so as to link said internal part to the facade (5) of a building; an external part (2) linked to the internal part (1) by second hinged linking means (7); and at least one foldable ladder (3). The module includes a transmission device (8, 9) for the transmission of a swinging motion from the internal part (1) to the external part (2). <IMAGE>
