Abstract (en)  
[origin: WO9637594A1] A personal cleansing composition comprising: (a) from about 1 % to about 30 % by weight of a dispersed oil phase comprising a first oil component having an oil/surfactant solution interfacial tension (IFT) of greater than about 1.0 dynes/cm and a second oil component having an oil/surfactant solution interfacial tension (IFT) in the range of from about 0.1 to about 1.0 dynes/cm; and (b) from about 5 % to about 30 % by weight of water-soluble surfactant selected from anionic, nonionic, zwitterionic and amphoteric surfactants and mixtures thereof; and (c) water; and wherein the ratio of first to second dispersed oil component is in the range from about 20 : 1 to about 1 : 20. The cleansing products demonstrate excellent in-use efficacy benefits including excellent skin feel during and after use, good lather volume, stability and appearance characteristics, good skin conditioning, mildness, stability, cleansing, good water feel and appearance.
