Abstract (en)
[origin: WO9637599A1] A granular detergent composition having a bulk density of at least 650 g/l, containing a granular base powder obtainable by a process involving a mechanical mixing step which contains an organic surfactant system, detergent builder and a soap, and further containing, as a post dosed material, less than 30 % of an inorganic sulphate salt having average particle size of at least 250 microns wherein no more than 25 % of the salt has a particle size less than 180 microns, or, not more than 20 wt.% of an inorganic sulphate salt having an average particle size of less than 350 microns wherein no more than 40 % of the said salt has a particle size less than 180 microns; provided that the inorganic sulphate salt is not agglomerated with fabric softening clay.
