Abstract (en)

A high torque tool handle comprises a handle 10 having a longitudinal axis and further having a tool end and a distal end. The handle 10 includes an elongate recess 24 aligned parallel to the longitudinal axis of the handles. An elongate gripping member 20 is sized to be received within the recess and positioned therein. The gripping member 20 is pivotally connected to the handle 10 by way of a pin 22 whereby the gripping member may be pivoted about one end of the gripping member out of the recess to an extended position. <IMAGE>
