Abstract (en)
[origin: DE19637046C1] Each of the side walls of the inking tub has a recess producing a gap and facing the cylinder. a seal encompassing the periphery of the cylinder (1) and covering the gap is provided per side wall (26), incorporating a number of interconnected individual components. The side walls are double-walled. The seal (32) is arranged in the intermediate space between the walls of the double-walled side walls. It is at a slight distance from or in frictional contact with the walls. The side walls are removable. The seal is chain-type in its structure and has a number of tabs arranged one behind the other. The tabs are arranged on bolts which are threaded onto a cable. Both ends of the tabs are convexly rounded.
