Abstract (en)
The washing machine has an oscillating washing solution container, which is fastened detachably on the housing by means of a component assembly. The assembly comprises ≥ 1 cross bar (2), which is fastened on the housing at two points at its ends, and features two fixing points for the container system. The fixing points are located between the fastenings on the housing and the cross bar (2) is less rigid between the fixing points than in the sections between the ends and the fixing points.

Abstract (de)
Zum Schutz von übergroßen, in den Laugenbehälter eingeleiteten Transport-Stoßkräften ist der Zentralabschnitt 10 einer Traverse 2 für einen Bausatz zur Transportsicherung des schwingend aufgehängten Laugenbehältersystems weniger steif ausgebildet als ihre Endabschnitte 3.
