Abstract (en)

[origin: EP0829587A1] 1.- Improved device to abstract moisture from a wall or similar, consisting of air guide means (7) which can be applied in a hole (8) in a wall (2) and which define an air guide channel (9) between two openings (10-11), which extend in different directions outside the wall (2), whereby the air that flows through the air guide channel (9), can carry off moisture originating from the wall (2), characterized in that the device (1) is provided with means (13) which form a cover between the air guide channel (9) and a cavity (5), possibly present in the wall (2) or similar.
