Abstract (en)
The hydraulic drive has a piston 13 in a cylinder 12 and has a coupled piston rod 14 that is displaced to operate a high voltage circuit breaker switch 15. The pressurised fluid is supplied from a pressure cylinder 16 in a base unit via a damping element 30. The cylinder has a pair of pistons 18,19 that are coupled to spring stack elements 22,23 that load the system.
