Abstract (en)

[origin: WO9639472A1] For performing heat exchange with a target (B) by using a heat transfer medium so that heat transfer takes place as the medium moves relative to the target (B) simultaneously undergoing mixing aqueous solution of potassium formate is used as the medium. The heat transfer medium is either a cooling medium for cooling (C) the target (B) or heating medium for heating (H) the target (B).
