Abstract (en)

A switching device, such as a control or actuator relay having a vertical actuation direction in the mounting position, on to which is couplable, frontally, an auxiliary switching unit (5) actuated by the switching device. The switching device (1) has a code characteristic for its design or model and the associated auxiliary switching unit (5), couplable on to the switching device, is matched to the coding (12) with or without a complementary accessory (13). The coding arrangement used is specifically at least one coding pin (12), and the complementary accessory (13) is a coding salience or projection (13) e.g on a fixture lug (11).

Abstract (de)

Ein erfindungsgemäßes Schaltgerät (1) und ein hinsichtlich der Kontaktbestückung zugehöriger, ankoppelbarer Hilfsschalterblock (5) werden mit aufeinander abgestimmter Kodierung (12, 13) versehen, um somit die Ankopplung von einem nicht zugehörigen Hilfsschalterblock (5) zu vermeiden.
