Abstract (en)
[origin: WO9735644A1] Footwear for both land and water use, comprising of a sole (D), a flipper (P) mounted rotating on to the sole (D) by means of a pivot (F) in such a way as to enable rotation between a first position (15) where the flipper (P) is external to the sole (D) outline and a second position (16) in which the flipper (P) is contained in the outline of the sole (D); the footwear (A) moreover includes a plurality of synergical means to fix the flipper (P) when in use respectively in the first position (15) and in the second position (16).
