Abstract (en)
The switch has a switch chamber (1) receiving a fixed contact piece (3) which is secured to prevent its removal by a lug (9) formed integral with the coil former (5) for the coil system of the electromagnetic operating drive. Pref. the fixed contact piece is inserted through a slit (7) in the switch chamber between partition walls (6) which have reception grooves cooperating with the fixed contact piece, the retaining lug fitting into a slot defined between the fixed contact piece and projections of the partition walls.

Abstract (de)
Bei dem erfindungsgemäßen elektrischen Schaltgerät sind die als Festkontakte dienenden Schaltstücke (3) durch Lappen (9) gegen Herausziehen gesichert, die am Spulenkörper (5) des zum elektromagnetischen Antrieb gehörenden Spulensystems angeformt sind. <IMAGE>
