Abstract (en)
[origin: EP0833356A2] The switch has a switch chamber (1) receiving a fixed contact piece (3) which is secured to prevent its removal by a lug (9) formed integral with the coil former (5) for the coil system of the electromagnetic operating drive. Pref. the fixed contact piece is inserted through a slit (7) in the switch chamber between partition walls (6) which have reception grooves cooperating with the fixed contact piece, the retaining lug fitting into a slot defined between the fixed contact piece and projections of the partition walls.
