Abstract (en)

[origin: WO9700991A1] Dry cleaning compositions are formulated with anti-static agents and are suitable for home use. Thus, cleaning compositions comprising water, butoxy propoxy propanol, optional 1,2-octanediol and optional surfactants are formulated with anionic anti-static agents such as sulfonated polystyrene or sulfonated polystyrene/maleic anhydride polymers to provide anti-static benefits to garments. The composition is placed on a pad or other carrier and tumbled with garments in a hot air clothes dryer. The garments are cleaned and free from static electricity.
