Abstract (en)

[origin: EP0834636A2] The location point has a bearing surface (3) for supporting the manually-operated data processing device (4) and a wall (1) which partially encloses the latter, cooperating with a second wall (2) which can be moved between a closed and open position. The movable wall is normally open to provide free access to the data processing device and can be closed by the operator to provide privacy.
