Abstract (en)  
[origin: EP0834744A2] The plug terminal has a connection part (1) with connection terminals for electric leads and spring contacts (16) standing in an electrical connection with the connection terminals. A holder (2), which carries the meter, is swivelable about an axis (19) to the plane of the spring contacts (16). Contacts (22) are provided at the holder, for the electric connection with the meter contact bar (24), also bridging contacts. The contacts (22) and the bridging contacts (26) are displaceable by the swivelling of the holder (2) in or out of engagement with the spring contacts of the holder, standing in an electrical connection in a transition region, between a meter operating position and a meter exchange position, simultaneously with the spring contacts (16) of the connection part (1).
