Abstract (en)  
[origin: EP0587910A1] A lightweight speaker of high efficiency and high performance. In a usual speaker or a speaker provided with a magnetic circuit of a repulsive field type, a voice coil (1) includes a complex wire A comprising a conductive wire made of a conductive material C and a magnetic material F arranged at least on a part of the surface of the conductive wire. Alternatively, the complex wire A may comprise a magnetic wire made of a magnetic material F and a conductive material C arranged at least on a part of the surface of the magnetic wire. <IMAGE>
