Abstract (en)

The device includes a casing (1) with an integrated amplifier circuit (3) which comprises at least one microphone (2), a switch- and/or connection devices (8, 9), two filter devices (7), an amplifier device (6) and a voltage source (5). The amplifier circuit is connected to a loudspeaker (4), and has a protection arrangement against the effect of high-frequency signals. The integrated amplifier circuit is protected against performance-related HF currents by several filter elements (11-15), which are passive filters of first or higher order. The filter elements are provided in electric connections (20) to the amplifier circuit, directly on the integrated circuit (IC).

Abstract (de)

Zur Verbesserung der EMV-Festigkeit und zum besonderen Störschutz ist die integrierte Verstärker- und Übertragungsschaltung (3) des Hörhilfegerätes durch Filterelemente (11-15) gegen leitungsgebundene HF-Störströme geschützt, wobei die Filterelemente in elektrischen Anschlüssen (20) der Verstärkerschaltung und unmittelbar am integrierten Schaltkreis vorgesehen sind. <IMAGE>
