Abstract (en)
[origin: WO9735781A1] A pilfer-resistant basket-style carrier (10) comprising a bottom panel, first and second side panels (21) opposite each other and connected to the bottom panel, and first and second end panels (18) opposite each other and connected to the first and second side panels. A removable roof (40) is connected to and extends from the first side panel to the second side panel. The removable roof includes finger grips (42, 43) for carrying the carrier. A handle panel with a handle opening is positioned beneath the removable roof. The handle panel extends between and is connected to the first and second end panels. Partitions (51-54) extend between the handle panel and the first and second side panels to define cells for containing articles received therein. Openings (26-28) are formed in the side panels and/or end panels for viewing articles contained in the carrier.
