Abstract (en)

[origin: EP0835810A1] The side flaps of the packing, i.e. the inner (24) and outer (25) flaps, and/or the bottom flaps (38,39), are glued together by glue points (26), especially by a number of spaced apart glue points extending in the longitudinal direction of the flaps. The inner and outer flaps of the side wall are interconnected by at least five, and preferably seven equally spaced glue points located in a row, including at least one glue point (26) in the area of the bottom wall.
