Abstract (en)
[origin: EP0837173A1] A process is for controlling the rinsing process of a washing machine and involves registering measuring values corresponding to the water level in an area below the drum, or values corresponding the temporal course of the water level, during the rinsing process. The values are compared to pre-set reference values and future control takes place in accordance with the comparison results. The associated washing machine features an evaluator device (10) for carrying out the comparison.
